PROFESSIONAL SUMMARY

MERN Stack Developer with 2 years of experience building scalable web applications using React.js, Node.js, and MongoDB. Skilled in developing secure REST APIs, optimizing performance, and implementing JWT-based authentication. Delivered multiple production-ready applications with responsive UI and efficient backend architecture.

EXPERIENCE

MERN Stack Developer, *Intechnet Limited*

01/2024 – 02/2026

Hyderabad

- Developed and maintained **5+ full-stack web applications** using the MERN stack, improving overall system efficiency by **30%**
- Built **15+ scalable RESTful APIs**, reducing data retrieval time by **25%**
- Designed reusable React.js components, improving UI development speed by **40%**
- Optimized MongoDB schemas, reducing query execution time by **20%**
- Implemented **JWT-based authentication & RBAC**, enhancing application security and reducing unauthorized access risks
- Collaborated with cross-functional teams in Agile environment, ensuring **on-time delivery of 100% sprint tasks**
- Conducted API testing using Postman, identifying and fixing **95% of critical bugs before deployment**

Frontend Developer Intern, *Deloitte*

01/2022 – 01/2023

Hyderabad

- Developed responsive UI components using React.js, improving user experience across **multiple devices**
- Integrated REST APIs to display real-time data, improving application interactivity
- Fixed UI bugs and improved performance, reducing page load time by **15%**
- Built reusable components, reducing development effort by **30%**.

Frontend Developer Intern, *Krify*

06/2020 – 07/2020

Kakinada

- Developed a personal portfolio website with optimized performance and responsive design
- Improved page load speed by **20%** through code optimization

EDUCATION & CERTIFICATIONS

B.Tech - Information Technology, *SASI Institute of Technology & Engineering*

2017 – 2021

Tadepalligudem, India

CORE SKILLS

MERN Stack Development

- MongoDB, Express.js, React.js, Node.js

Frameworks & Libraries

- React.js, Redux

Database Management

- MongoDB, Mongoose
- SQL (MySQL / PostgreSQL)

Frontend Development

- HTML5, CSS3
- Responsive Design (Bootstrap, Tailwind CSS)

Version Control

Git, GitHub

Programming Languages

- JavaScript (ES6+), Python

Backend Development

- Node.js, Express.js,
- RESTful API Development

Authentication & Security

- JWT Authentication
- Role-Based Access Control

API Integration

- REST APIs, JSON, Axios

Development Tools

VS Code, Postman.

PROJECTS

1-on-1 Mentor-Student Platform, *1-on-1 Mentor-Student Platform*

- Developed a full-stack mentorship platform enabling **real-time 1-on-1 coding sessions** between mentors and students.
- Built a responsive frontend using **Next.js and TypeScript**, implementing secure authentication with **Supabase Auth**.
- Designed and developed backend services with **Node.js and Express.js**, integrating [Socket.io](#) for low-latency real-time communication.
- Implemented **live collaborative coding** using Monaco Editor with real-time synchronization across users.
- Integrated **WebRTC-based video calling** for seamless mentor-student interaction during sessions.
- Designed **role-based workflows** for mentors and students, including session creation, joining via unique session codes, and chat messaging.
- Structured and managed data using **PostgreSQL (Supabase)** for user profiles, sessions, and message storage.

Smart Project Management Platform (MERN), *Smart Project Management Platform*

- Developed a full-stack project management system using MongoDB, Express.js, React.js, and Node.js.
- Implemented task assignment, project tracking, and team collaboration features.
- Built JWT authentication and REST APIs for secure user access.
- Designed an interactive React dashboard to track project progress and task status.

Ancestral Medicine Plants Offline App, *Ancestral Medicine Plants Offline App*

- Developed an offline web application showcasing traditional medicinal plants and their health benefits.
- Designed a responsive interface for easy exploration of herbal knowledge.
- Implemented offline data access using browser storage techniques.
- Organized plant information into structured categories for improved user experience.

Landmine Soft - Company Website, *Landmine Soft - Company Website*

- Developed a responsive company website for Landmine Soft to showcase software development services, products, and company information.

- Designed modern UI/UX layouts using responsive web design principles for seamless experience across devices.
- Implemented structured pages including home, services, about, and contact sections to present company offerings clearly.
- Optimized website performance and accessibility to improve user engagement and navigation.

Periodic Table Web Application, *Periodic Table Web Application*

- Developed an interactive periodic table application to display chemical element information.
- Implemented dynamic UI to show atomic number, mass, and element properties.
- Designed a responsive and user-friendly interface for exploring chemical elements.

BLOGENTO - MERN Blogging Platform, *BLOGENTO - MERN Blogging Platform*

- Developed a full-stack blogging application using MongoDB, Express.js, React.js, and Node.js.
- Implemented JWT authentication and secure REST APIs for blog and user management.
- Built a responsive React.js interface for creating, editing, and managing blog posts.
- Integrated MongoDB database for storing blog content and user information.

NoteVault - Secure Notes Manager, *NoteVault - Secure Notes Manager*

- Built a secure note management application with JWT authentication.
- Implemented CRUD operations for managing notes.
- Integrated MongoDB database for secure data storage.

ShopEasy - MERN E-Commerce Platform, *ShopEasy - MERN E-Commerce Platform*

- Built a full-stack e-commerce application with product listing, shopping cart, and order management.
- Developed backend APIs using Node.js and Express.js.
- Designed responsive React.js UI for product browsing and checkout process.

NexERP Management System, *NexERP - MERN Full Stack ERP System*

- Developed a business ERP system to manage organizational operations and centralized data.
- Implemented role-based authentication and dashboard features.
- Built REST APIs using Node.js and Express.js.
- Developed interactive React.js frontend integrated with MongoDB database.

CRUD User Management Application, *CRUD User Management Application*

- Developed a React.js application to manage user records using CRUD operations.
- Integrated REST APIs for dynamic data retrieval and updates.
- Built reusable React components for scalable UI development.
- Designed a responsive interface for efficient user management.

CERTIFICATES

- Frontend Development Certification
- React.js Certification

ADDITIONAL SKILLS

- Problem Solving
- Team Collaboration
- Time Management
- Problem Solving & Debugging
